

It would be so difficult for us to
speak the same language,
if our job only consisted of threads,
needles, fabrics and machines.
Therefore we become a
"Head turner"

Speaking the same language...
Speaking the same language...
Speaking the same language...

 How does
a woman
who wears
the trousers
we manufactured
feel?

*We have asked
ourselves
this question
for 30 years.*

CE

Our job
involves sewing
the desired
design.
Nothing more
nothing less...
Sewing as
realizing the
expectations of
a woman.

*And sewing
trousers,
only for women.*

Our motto is to appreciate the value of teamwork, as we believe this to be the backbone of all successful working environments and the language that speaks out to all creators of fashion.

Technology,
high quality
standards,
inspections,
knowledge and
craftsmanship...
Having all of the
above is just one
element of
sustaining success.

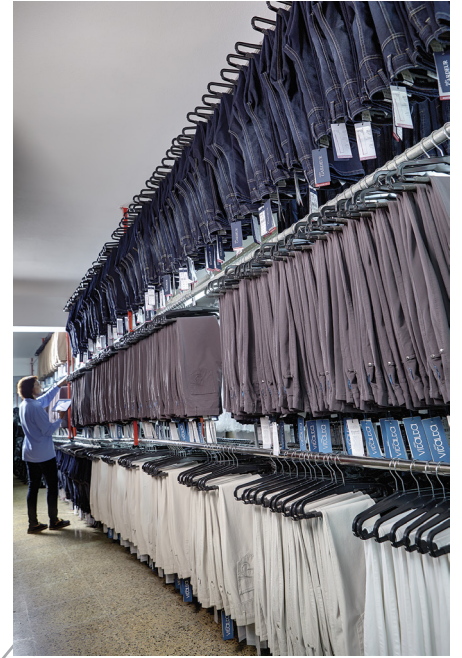

The other half of our 30 year success story is working as a part of team which involves everyone liaising with each other; from stencilers to ironers, from workmasters to board of management...

All having a sense of responsibility and aiming for the highest standard achievable.

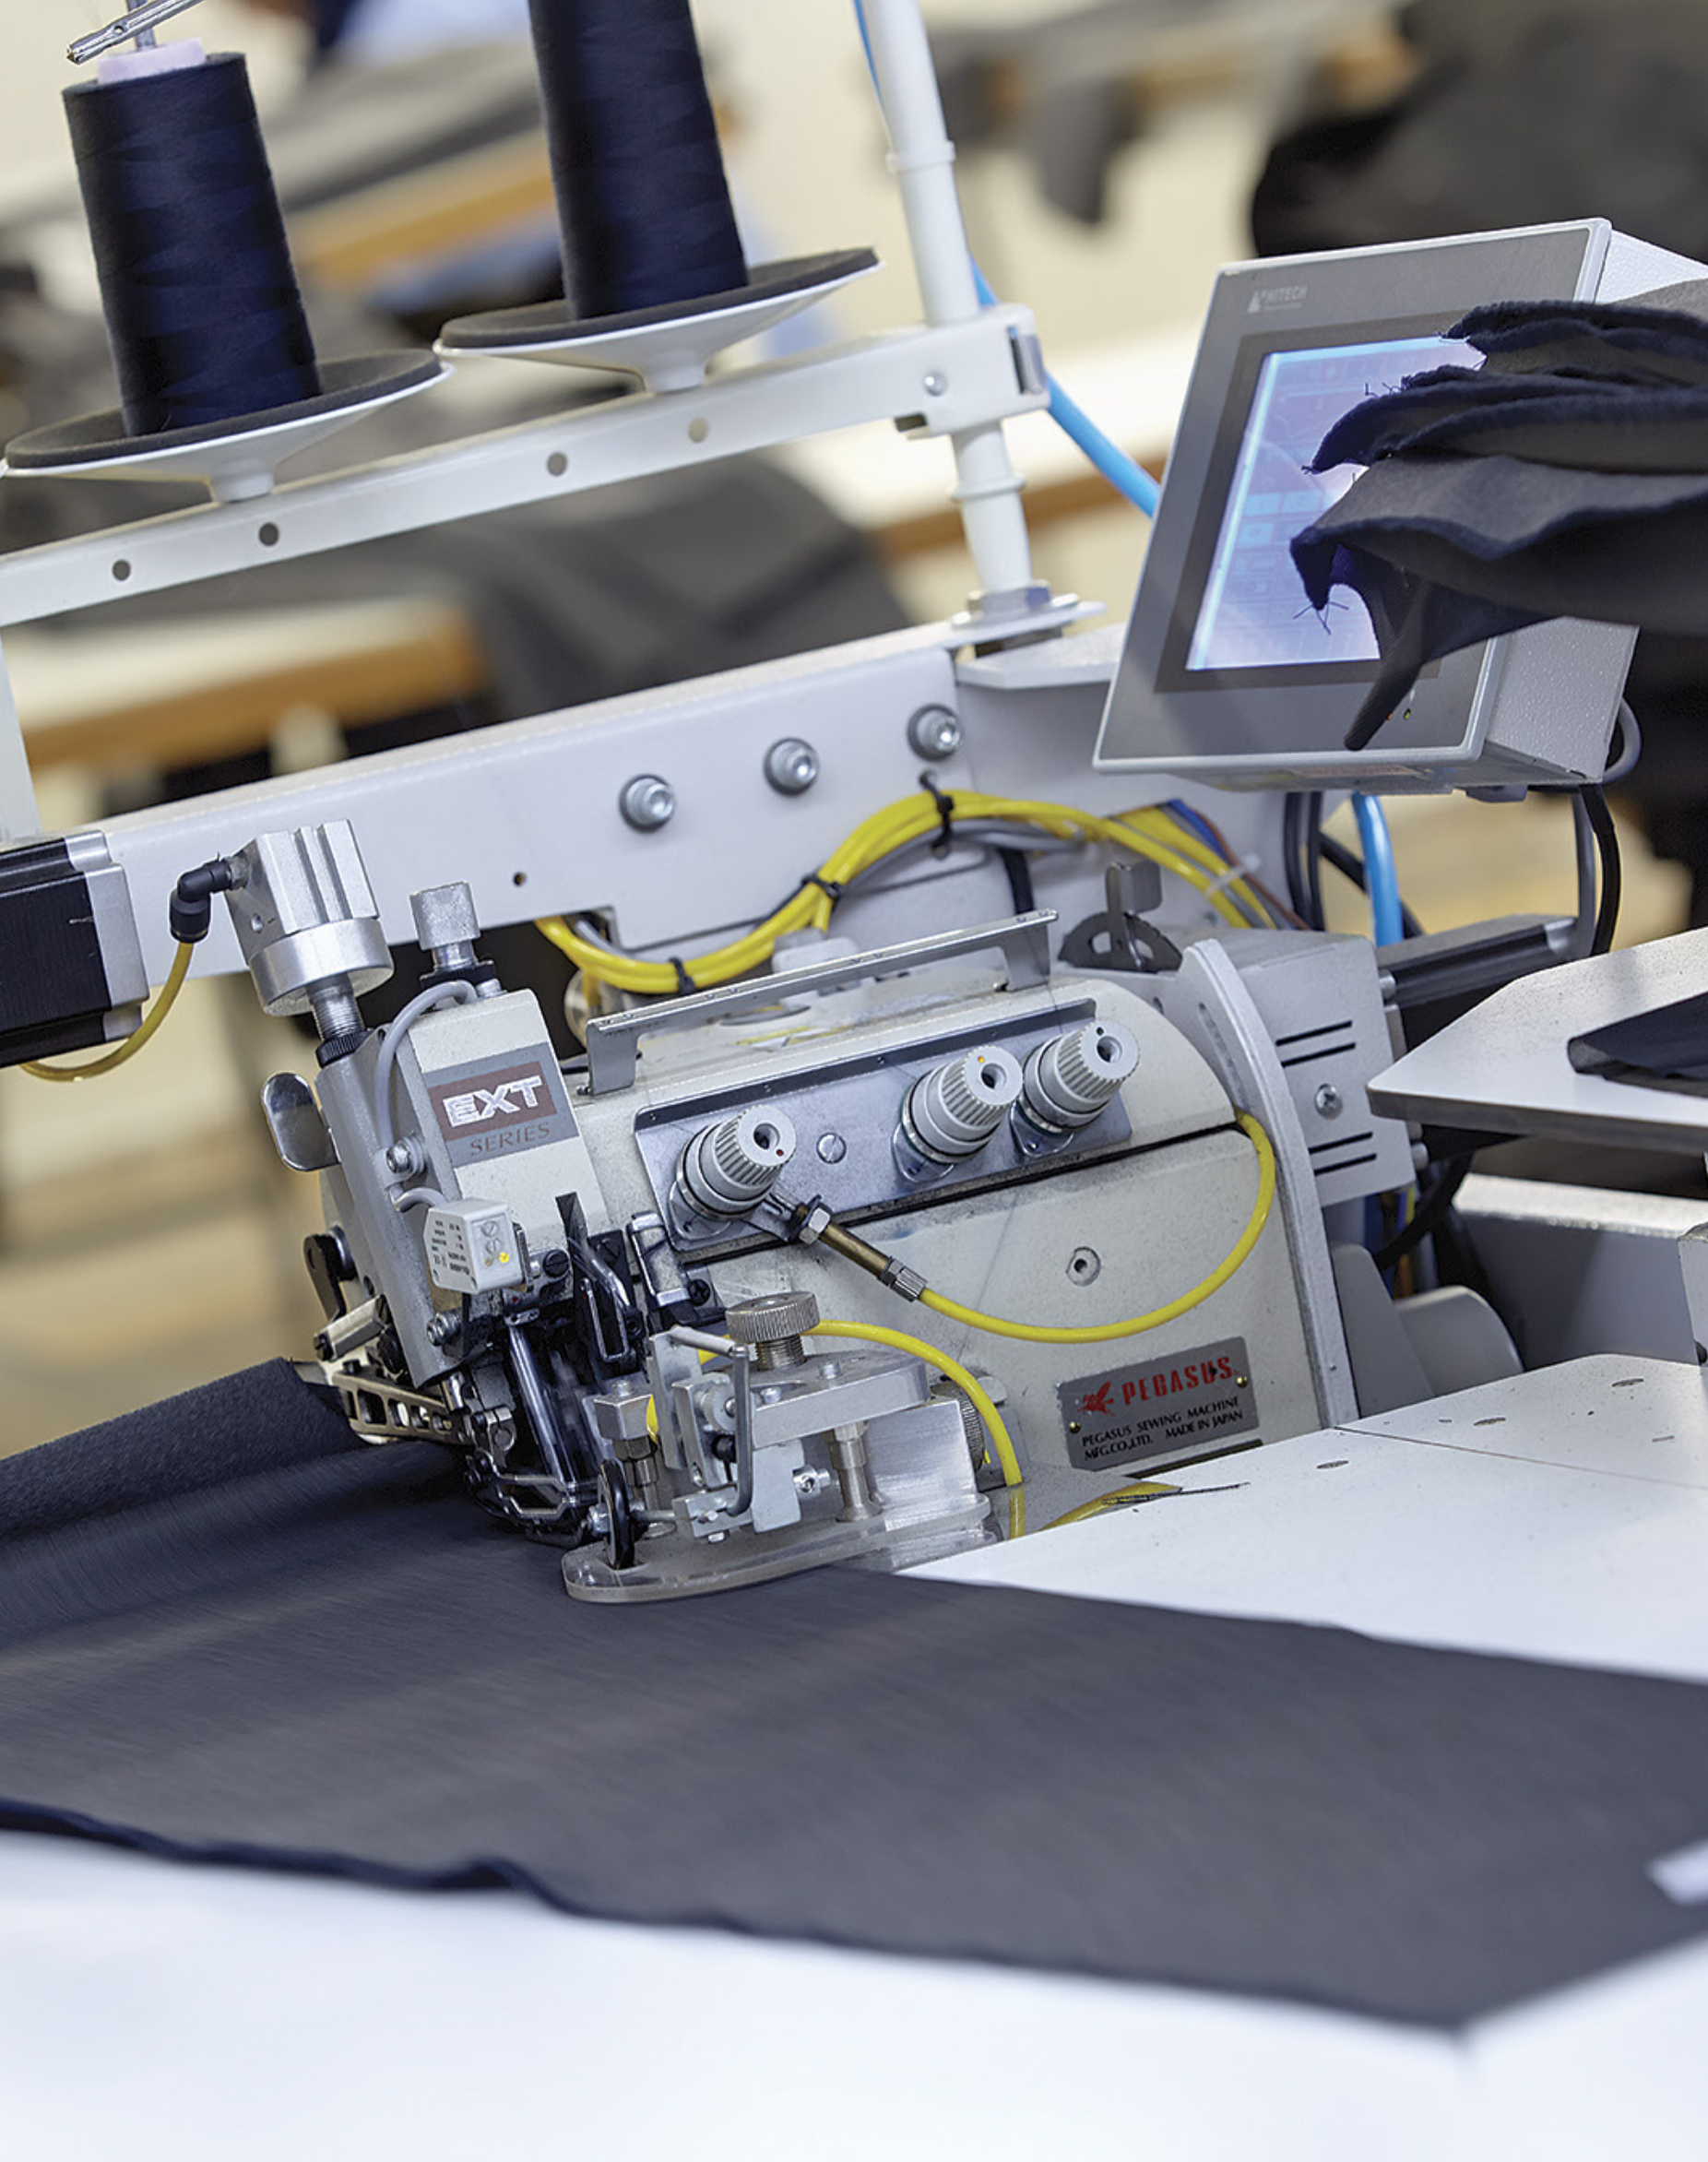

An understanding and principle of delivering all products flawlessly and on time, also thinking on behalf of the customer and indigenising being close forever.

There is a basic criteria of manufacturing
550.000 flawless trousers in one year:
The happiness of our workers and their
commitment to the work.

That woman...

*Our common ground,
Our ultimate goal of success...*

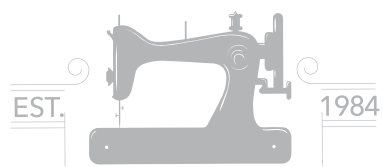

While moving as desired at home, in the streets and at work, pleased with the trousers she wore; the neat smile accompanies an avenue, a boulevard, sitting or standing.

That happy, confident woman.
Our common ground,
ultimate goal of success.

We succeed together,
always and forever.
